Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to applicant's amendment dated Feb. 05, 2004. the following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 14-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Den Enden et al (6115340).

The independent claims merely read on recording an ID, a mark, a sync mark... etc at the end of data recording to determine where the next recording should start. Such interpretation is merely a logical engineering capability in order for the system to be operational. The reference shows the use interleaving old data recorded on a disk with new data to be recorded on the disk as shown in fig 7. The reference also discloses the use of ID information in order to determine the start of the newly recorded data as cited in column 6 line 36-68.

With respect to the limitations of claims 14-16 and 18. the reference in fig 7 shows the newly recorded data being interleaved with the old data on the disk having dummy data recorded at the run-in and run-out sectors and the ID information being recorded to determine the start of recording as cited in column 6 lines 36-68, fig5 and fig 6.
